MECHANICAL DISPENSER FOR PAPER TOWEL ROLLS

MERIDA UNIQUE LUX CUT

Device available in two versions:

- MERIDA UNIQUE SPARK high gloss - symbol CUH361
- MERIDA UNIQUE matt - symbol CUH311

The exclusive look and unique patented "straight cut" system make the dispenser exceptional. Innovative cutting mechanisms with four opposing knives ensure that each cut-off towel has four straight edges.

Thanks to its compact construction, the dispenser remains small while holding a 250 meter long towel roll. When cut every 25 cm, one roll produces 1000 towel sheets!! The device is made of high quality ABS plastic, with transparent sides and back to provide easy control of refill levels at all times.

MECHANICAL DISPENSER FOR PAPER TOWEL ROLLS

MERIDA UNIQUE SOLID CUT

Device available in two versions:

- MERIDA UNIQUE SPARK high gloss - symbol CUH362
- MERIDA UNIQUE matt - symbol CUH312

Despite its small size the paper towel roll dispenser holds a large 250 meter long towel roll. When cut every 24 cm more than 1000 towel sheets are produced from a single roll! Simply insert the roll and forget about refilling for a long time. The reliable and effective cutting mechanism is extremely simple in its construction ensuring smooth and gentle functioning. The cutting knife is made of very hard plastic which is resistant to blunting and deformation. Our tests have proven that even after 2 million cuts the knife lost none of its properties. The dispenser is made of high quality ABS plastic. The back and sides of the device are made of transparent plastic providing easy control of the refill levels all the times.

MERIDA UNIQUE SPARK high gloss - symbol GUH761

MERIDA UNIQUE matt - symbol GUH711

ELECTRONIC AIR FRESHENER

Device available in two versions:

- MERIDA UNIQUE SPARK high gloss - symbol GUH761
- MERIDA UNIQUE matt - symbol GUH711

Highly efficient and fully automatic electronic air freshener with an elegant and slim appearance provides maximum scent effect in rooms with volumes up to 170 m³.

Equipped with an electronic programmer that allows the following parameters to be set: current time and day of the week, start time of the device, end time of the device, the interval between the doses of the fragrance (from 1 to 60 minutes), the days when the device is not working. Following the programming of the air freshener, information is displayed as to the amount of days one refill last. The air freshener, which is locked by a key, is powered by two R14 batteries and made of high quality durable ABS plastic. This device can be used in any room. A selection of eighteen fantastic scents of the highest quality are available in our offer.
